Professional Summary

DevOps Engineer with hands-on experience designing, automating, and securing scalable cloud infrastructure on AWS. Strong background in CI/CD pipelines, Kubernetes orchestration, Infrastructure as Code, monitoring, and Linux system administration. Proven ability to reduce costs, improve reliability, and automate deployments across production environments. Passionate about building resilient, secure, and high-performance systems at scale.

Technical Skills

Cloud & Infrastructure: AWS (EC2, S3, IAM, RDS, VPC, CloudFront, Load Balancers), Infrastructure Scaling, Cost Optimization

DevOps & Automation: Docker, Kubernetes, Jenkins, CI/CD Pipelines, Terraform, Ansible, Bash/Shell Scripting

Monitoring & Observability: CloudWatch, Prometheus, Grafana, Logging, Alerts, Root Cause Analysis

Web Servers & Networking: Nginx, Apache, Reverse Proxy, Multi-Site Hosting, CDN

Security & Reliability: SSL/TLS, Firewalls (CSF, LFD), VPN (OpenVPN), MFA, Vulnerability Management, OS Hardening

Databases & Programming: MySQL, PostgreSQL, Master-Slave Replication, MaxScale, Python, SQL, HTML/CSS

Soft Skills: Problem Solving, Ownership, Collaboration, Adaptability, Effective Communication

Experience

Support Hives Technology LLP — DevOps Engineer

Sep 2024 – Present

Mumbai, India

- Optimized AWS infrastructure for high availability and scalability, reducing cloud costs while improving performance.
- Designed and maintained CI/CD pipelines using Jenkins and GitHub webhooks, enabling automated multi-environment deployments.
- Implemented Infrastructure as Code using Terraform to provision and manage AWS resources with consistency and repeatability.
- Deployed and managed Kubernetes clusters for containerized applications, ensuring zero-downtime releases.
- Integrated monitoring and alerting using CloudWatch, Prometheus, and Grafana for proactive incident detection.
- Strengthened security posture by implementing VPN-based access, MFA, OS hardening, and regular patching.

Support Hives Technology LLP — DevOps Intern

Apr 2024 – Aug 2024

Mumbai, India

- Containerized production workloads using Docker and Kubernetes, improving deployment consistency and reliability.
- Automated operational tasks using Bash scripts, reducing manual effort by approximately 40%.
- Investigated and resolved production incidents through detailed root cause analysis, preventing repeat failures.

Projects

GenS Deployment Platform (AWS, CI/CD, Scalability)

- Managed multi-environment deployments for Laravel, Django, React, and Node.js applications on AWS.
- Built automated CI/CD pipelines and optimized Nginx and Gunicorn configurations for high performance.
- Implemented monitoring, secure access controls, and uptime tracking for production systems.

Multi-Site Hosting Infrastructure (Docker)

- Hosted and managed 400+ applications using Docker.
- Implemented auto-scaling, centralized logging, automated backups, and fault-tolerant architecture.

Secure Production Deployments (AWS, Security Engineering)

- Deployed and secured WordPress and web applications on AWS using SSL/TLS, firewall rules, and performance tuning.
- Configured OpenVPN with MFA for secure SSH access and hardened Linux servers.
- Implemented MySQL master-slave replication with MaxScale for high availability and load distribution.

Education

Bachelor of Science in Computer Science

Aug 2022 – May 2025

Sheth L. U. J. and Sir M. V. College of Science, Commerce and Arts, Mumbai

Relevant Coursework: Operating Systems, Data Structures, Algorithms, Cloud Computing, Networking, Database Management, Software Engineering

Higher Secondary School Certificate (Science)

Jul 2020 – May 2022

Siddharth College of Arts, Science and Commerce, Mumbai

Honors & Awards

- 1st Position — IoT Innovation Competition, Sheth L.U.J. College & Sir M.V. College (April 2024)
